Work Experience

Work Experience

Work Experience	Experience Level	Note	Edit Work Experience	Remove Work Experience
Automation	3-Role Model	Designed and implemented a scalable chatbot architecture from inception, utilizing Webex as the front-end interface for cloud community query management. The solution incorporated AI for intelligent responses and was meticulously built on AWS Lambda, API Gateway, Route 53, and DynamoDB, with seamless integration via Webex webhooks.		
Data Usage & Access	3-Role Model	Work with the Data Engineering Team to help move data from ElasticSearch to DynamoDB. Involves an architectural approach for planning, analyzing, designing, and implementing applications. Information technology engineering has many purposes, including organization planning, business re-engineering, information systems planning and systems re-engineering.		
Software Architecture	3-Role Model	Optimized user information retrieval by integrating the ServiceNow API and creating a dedicated AWS API. Leveraging Lambda for serverless compute, DynamoDB for scalable data storage and caching, and Route53 for DNS management, this solution provided a streamlined method to query user details using various identifiers (name, email, ID)		
Software Engineering	3-Role Model	Moved code repo to GitHub and deploy it using Terraform. Work with various AWS Services to monitor and alert account owners of cost anomalies within 24 hours. Integrate AWS cost anomalies with Cloudability cost anomaly.
